**LEWISTON:** The City of Lewiston has another positive feather in its cap! The newly installed colored concrete sidewalks on Lisbon Street have received the **2016 Excellence in Concrete Award for Architectural Concrete from the Northern New England Concrete Promotion**

**Association.** The project was designed by the City of Lewiston as part of the Maine Department of Transportation Locally Administered Project program with the majority of the project being funded by the Federal Highway Administration.

The project replaced the existing failing concrete pavers with cast in place colored concrete pattern with brick inlay and paver edging. The sidewalks were completed as part of a larger enhancement project which included repaving the street, lighting upgrades, ADA upgrades, and signal improvements to the downtown.

***“This award was a pleasant surprise for the City to receive. The Lisbon Street project is one we are very proud of, and it is rewarding for others to recognize all that went into making the project a success,”*** noted Director of Public Works Dave Jones.

The project was nominated for the award by concrete sub-contractor, Sundown Construction (Mike & Tim Mercier). J Pratt Construction (Josh Pratt) was the project contractor, and Lewiston's Ryan Barnes, P.E., was Project Engineer.

The Northern New England Concrete Promotion Association is a non-profit organization dedicated to the promotion, improvement, and growth of the ready-mixed concrete industry. Since 1987, the Association has worked diligently to represent the concrete industry through ongoing training and education, promotion, safety concerns, and long-range planning efforts. It serves and promotes the concrete industry in Maine, New Hampshire, and Vermont.
